Get vaccinated at a network retail pharmacy*

The next time you're at the pharmacy, think about getting the vaccinations you might need. Check with your doctor or pharmacist to see which vaccines are appropriate for you. Our large network of retail pharmacies can administer certain vaccines to eligible Blue Shield of California members[1] at no out-of-pocket cost at the pharmacy.

These vaccines are part of your preventive health benefits and can prevent certain health problems before they start. You don't need a prescription to get them. You also have the option to get these vaccines at your doctor's office, instead of at a pharmacy, if you prefer.

Vaccines are covered in accordance with guidelines established by the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC) and/or the California Department of Public Health (CDPH).[2]

If more information is needed, call the Customer Service number on your Blue Shield member ID card.

*Vaccine availability, age requirements, and administration policies may vary by pharmacy. Please contact the pharmacy in advance to confirm vaccine availability, age restrictions, appointment requirements, and that staff who are trained to administer the vaccines are available.

Covered vaccines

Vaccine	Coverage Requirements
Coronavirus (COVID-19)	6 months and older
Human papillomavirus, HPV (warts, cervical cancer)	9 years to 45 years
Influenza (flu)	6 months and older
